## Distinguished Service to the RE Community 1

**Daniel M. Berry**

- He has done an incredible amount of mentoring, including giving wise advice on many occasions.
- He embraces the notion of what's now termed diversity, accurately seeing it as enriching & extending the RE community.
- He has an active sense of fun, and makes it fun to do RE.
- His talk at the doctoral symposium is legend.
- He has been to every single RE and is someone who has been buzzing around since day 1.
- I've learned a lot about ambiguous textual requirements...

## Distinguished Service to the RE Community 2

### Roel Wieringa

- For sustained contribution, generosity of spirit and unfailing good humour.
- Roel is a longtime respected member and outstanding researcher in our community.
- One of his most remarked contributions in the last years are his tutorials on research methods / design science which have been inspiring to many of our PhD students. He has himself mentored a quantity of students and led an active group at UTwente.

Conference

Rio de Janeiro, Brasil  
July 15th – 19th, 2013

## Roel Wieringa

- According to Roel's personal website – he apparently has three different personas...

In the morning...

After he opens his inbox (so be careful before you email him!)

After he empties his inbox..

And we hope he'll add this one to show how happy he is to get this award...
